Debugging and Optimization

About me

A dedicated Game Developer with experience in Gameplay and AI Programming, Quality Assurance, and game testing for notable projects. Skilled in creating engaging gaming experiences, ensuring high quality, and enhancing user interaction through effective AI development and thorough testing.

Experience

Gameplay and AI Programmer   May 2023 - Present

Besto Games – Idol Showdown

- Designed and implemented complex AI behaviors for character interactions, enhancing gameplay mechanics and player immersion.
- Collaborated closely with the game design team to ensure smooth integration of AI functionalities aligned with game objectives.
- Conducted performance testing and debugging to optimize AI systems and ensure seamless gameplay experience.

Quality Assurance   Mar 2024 - Present

Holo Indie – Holo X Break

- Led quality assurance efforts to identify and resolve game bugs and performance issues, improving overall game stability and user experience.
- Coordinated with developers to communicate testing results and suggest improvements based on user feedback and gameplay analysis.

Game Tester   Aug 2024 - Present

Freelance – Exorcist Miko

- Partnered with the project lead, Kay Yu, in testing gameplay features and ensuring the game met industry standards.
- Provided valuable insights and feedback on game mechanics, controls, and user interface, contributing to the game's quality and playability.
